**We are working in partnership with our community pharmacies.**

**If you are suffering with any of the following conditions, we may refer you to them for treatment**

## Flu/Covid Clinics

Our flu/covid vaccines will be given together as advised by NHS England. These clinics for over 65s and at risk patients, will be held as DROP IN Clinics, on Saturday 1<sup>st</sup> & Sunday 2<sup>nd</sup> October 08.00 to 13.00 at both sites.

In the event that the covid vaccine is not delivered in time, the flu clinic will go ahead on the dates above and we will inform you of further clinic dates for your covid vaccine.

We are Proud to Announce that we have been Awarded a  
**GOLD AWARD**  
For Excellence in Teaching Year 4 Medical Students

The University of Manchester

## Greater Manchester's Dementia Care Pathway

We've been told that finding the right information and support when you're living with dementia, caring for someone living with dementia or delivering services for people living with dementia can be difficult. That's why we've developed this resource.

Dementia United [dementia-united.org.uk/](https://dementia-united.org.uk/) worked with people living with dementia, their care partners, and professionals in Greater Manchester to **find out what matters to them** and to use this information to **co-produce a set of 75 recommendations** which cover all stages of the dementia journey.

Each recommendation includes **information on how to access support and services across Greater Manchester and nationally**, as well as evidence as to why the recommendation is important and examples of best practice showing how it has been successfully implemented.

Whether you're looking for local information for yourself or a loved one, you're a commissioner looking for best practice guidance or you work in health and social care and are looking for the evidence behind different interventions, you'll find it in our dementia care pathway.

This resource has been developed by the Greater Manchester Health and Social Care Programme through its Dementia Programme (Dementia United) as part of an Integrated Care System.

To find out more visit our pathway website

# MMR

MEASLES MUMPS RUBELLA

**Measles is circulating, it is serious, very infectious and can cause complications.**

Especially for those with a weakened immune system, babies under one year and pregnant women.

You need **two doses of MMR vaccine** to protect you, see your **GP practice** to make an appointment.

**It is never too late to have your MMR.**
